The above issues limit the effectiveness of clinical decision support. The skills and training required to use technology and information systems, as well as team skills, need further development. The study found a blood pressure control rate of 95 percent, significantly better than what is usually seen. This section begins with a case study of a fictitious name, but based on a real situation. What is your preference? Prediction of hospital readmission for heart failure:
In recounting examples of reform at UPHS, Muller also highlighted elements of success. One example is the increase in redundant pneumococcal vaccinations for hospital inpatients as acute care facilities attempt to comply with Joint Commission Core Measures.
