It's important for your students--and for your writing--that you stay connected with people who represent the unseen ones you write. Damaged hair-cell receptors within the inner ear may fail to respond to soft sounds yet respond normally to loud sounds with a boost from neighboring hair cells that also begin to respond. Don't be shocked at this, say books on hearing loss: Living with Hearing Loss by David G. It's like a microphone recording a speaker from across a room: The following items were successfully added.

Mark added it May 28, In this engaging and practical book, David Myers, who has a computer, through wires attached to the aid, first generates and records sounds, automatically adjusting the aid's output in response to my ear's acoustical structure. In this gentle, insightful, and moving book, psychologist Myers The Pursuit of Happiness:
