White Sea Eagle patches of juveniles are also differently distributed in golden than juvenile white-tailed eagles. Sea-eagle nests are called aeries, and they are built high in dead or open-topped trees near rivers or on rocky cliffs, up to feet 30 meters above ground. The hatchlings known as eaglets will stay in the nest for about Sea Eagle 13 weeks. Bothspeciespreyedonthemanedduck. They are very similar to the tropical Haliaeetus species. However, Sea Eagle video from Russia shows a juvenile Steller's sea eagle aggressively displacing an adult from food during a protracted battle.
