For The Great Philosophers: Popper: Popper reason, it is impossible in principle that unconditional scientific prophecies could be made in relation to human history—the idea that the successful unconditional prediction of eclipses provides us with reasonable grounds for the hope of successful unconditional prediction regarding the evolution of human history turns out to be based upon a gross misconception, and is quite false. In the view of many social scientists, the more probable a theory is, the better it is, and if we have to choose between two theories which are equally strong in terms of their explanatory power, and differ only in that one is probable and the other is improbable, then we should choose the more probable. Internet Encyclopedia of Philosophy. The Age of Fallibility. Duke University Press, Dan added it Apr 13, 2013. Since scientific laws are non-existential in nature, they logically cannot be proven. our philosophy quotes quiz.
