Abstract Although considerable progress has been made in understanding how tumors evade immune surveillance, measures to counter the same have not kept pace with the advances made in designing effective strategies. Provision of antigen and CD signaling breaks immunological ignorance, promoting regression of poorly immunogenic tumors. Withoutabox Submit to Film Festivals.

Monoclonal antibodies directed against the T cell activation molecule CD137. Biological effects of BB signaling. Expression of co-stimulator BB molecule in hepatocellular carcinoma and adjacent non-tumor liver tissue, and its possible role in tumor immunity. Get fast, free shipping with Amazon Prime. Recently, antiBB has entered clinical trials, and results thus far show favorable toxicity. Expression of CD137 on human follicular dendritic cells.
