B The sense of hearing is assessed using the Rinne test and
the Weber test and a tuning fork. CPR and ACLS may be
necessary later, but not now as based on the fact that the
person only has a partial airway obstruction.
Primary intention healing is facilitated with wounds without infection.
Deontology is the ethical school of thought that requires that
both the means and the end goal must be moral and ethical; and
the utilitarian school of ethical thought states that the end
goal justifies the means even when the means are not moral.

The absence of sphygmomanometer for obese people was also evidenced in the study in a northeastern capital 3.
